Create more powerful, flexible applications using a new extension of the XML standard Programmers are finding that the XMI extension of the XML standard provides a lot more flexibility in writing software for sharing data. Written by one of the principal authors of XMI, this book provides programmers with everything they need to know to best utilize this extension. The authors cover the basics first, detailing the essential concepts and explaining how XMI relates to XML and UML. Readers will then learn how to program with XMI, including how to express data in XMI, create XMI documents with Java, and merge documents. Samples of real-world XMI applications are also included throughout the book that show how IBM is using XMI with data warehousing and how to convert simple relational databases into XMI. CD-ROM includes sample XMI source code and software tools for developing XMI and XML applications.

Erin Crawford is a relationship blogger with a bucket list and a vendetta. After years of horrible luck in relationships, she decides to start a blog called "30 First Dates." Her mission: go out with 30 men before her 30th birthday, all to find a non-jerk in 30 dates or less. As she blogs about her sometimes humorous and sometimes laughably bad dates, she crosses off her bucket list of 30 things she wants to do before she turns 30-and kills two birds with one stone by completing the items on her dates! In fourteen months she skydives, skinnydips, crashes a wedding, travels to multiple cities and lives way outside her comfort zone. The only question is, as her birthday approaches and her list grows smaller, will Erin be able to find love? Or is she destined to be a first-date-only kind of girl?

Once upon a time, Moses had had enough. Exhausted by the challenge of leading the Israelites from slavery to the Promised Land, Moses cried out to God, "What have I done to displease you that you put the burden of all these people on me? ... If this is how you are going to treat me, please go ahead and kill me" (Exodus 11:11, 15). If that sounds hauntingly familiar to you, you may be the senior pastor of a contemporary church. The burden of Christian leadership is becoming increasingly unbearable--demanding skills not native to the art of pastoring; demanding time that makes sabbath rest and even normal sleep patterns seem extravagant; demanding inhuman levels of efficiency, proficiency and even saintliness. No wonder pastors seem and even feel less human these days. No wonder they burn out or break down at an alarming rate; no wonder the church is missing the mark on its mission. In Creating a Missional Culture, JR Woodward offers a bold and surprisingly refreshing model for churches--not small adjustments around the periphery of a church's infrastructure but a radical reversioning of how a church ought to look, from its leadership structure to its mobilization of the laity. The end result looks surprisingly like the church that Jesus created and the apostles cultivated: a church not chasing the wind but rather going into the world and making disciples of Jesus.

Millions of undocumented immigrants live in the United States under constant threat of imprisonment or deportation. They survive underground, with little protection from exploitation by human smugglers, employers, or law enforcement. Underground America presents the remarkable oral histories of men and women struggling to carve out a life in the United States. Among the narrators: Farid, an Iranian-American business owner who employs a number of American citizens while he himself remains undocumented. A critic of the Iranian government, he fears for his safety if he is deported to his native country. Diana, who along with thousands of other Latino workers helped rebuild the Gulf Coast after Hurricane Katrina. After completing her work, she and many others were detained and imprisoned for not having proper documentation. Liso, who was enticed to come to the United States as a religious missionary, but on arrival was forced into unpaid domestic labor.

While trying to stop a demon infestation on the Island of Mid due to an opened Hellgate, seeker Raine Benares tries not to be distracted by the two powerful men, one good, one evil, that she is magically bonded to.

Rhythm is produced in "natural" as well as "cultural" ways. Natural rhythm is not controlled by man, no more than we can control the ebb and tide of the ocean, the rising and setting of the sun, the seasons of the year, or our own life cycle, heartbeat or breathing. But what man does with his body may become a cultural fact: the way we walk, work, dance, sing, make music and decorate objects. In music, rhythm is the organization of time in units. In visual arts rhythm refers to the arrangement of regularly recurring motifs. Rhythmic cycles in the music of the Islamic world are illustrated in the correspondences between the art of sound and the other arts: poetry and musical rhythms are related to geometrical patterns and calligraphy. In South Indian music, the analogies between rhythm, woven patterns and symbolic figures are striking. Weaving patterns reveal themselves as they emerge from the loom or unfold before the discerning eye, just as a listener delights in the patterns gradually perceived by the mind, and not merely received by the ear. The symbolic meanings of motifs and colors are an expression of the relation between man and the cosmos." Rhythm, A Dance in Time" explores all these aspects of rhythm: rhythm to be heard and rhythm to be seen.

In 1914, Daisy lives in the quiet New Zealand valley where her family has farmed for generations. A cherished only child with an adored older cousin, and surrounded by a sprawling extended family, her world seems a warm and safe one. But the Great War is casting its long shadow over New Zealand. Daisy watches in growing fear as more and more of the men leave to fight in Europe, and the War strikes ever closer to the heart of her family. Daisy's War opens five years after the end of A Second Chance. The settings and many of the characters from the earlier books are revisited, while a new generation is introduced: that of Amy's grandchildren.
