Of the study aids I found 2000 Solved problems the most useful (oftentimes textbooks kind of leave you hanging for problem sets), followed by Math for Computer Applications. I think you should buy a print version of the latter though as the kindle version frequently cuts off graphs on the right and the conversion to digital is occasionally dodgy.

This final year/postgraduate text for courses in digital filters or digital signal processing deals with the construction of algorithms that filter data into useful information. It starts with the basics and goes on to cover advanced topics such as recursive and non-recursive filters (including optimization techniques), wave digital filters and DFTs. A new chapter on the application of digital signal processing offers up-to-date techniques and there are new problems and examples throughout. A solutions manual is available (0-07-002122-8).

Globalization has shifted perspectives on individualism and identity as cultural exchange occurs more rapidly in an age of heightened connectivity. As technology connects those around the world, it too helps to provoke a shift in the autonomy of individuals. The Handbook of Research on Individualism and Identity in the Globalized Digital Age is an essential resource for researchers, professionals, and graduate-level students. This book explores and explains how globalization has impacted humans with specific emphasis on education and human development. This research-based publication presents critical perspectives on universal changes that are occurring due to globalization.
