The second edition of Emergency and Trauma Care for Nurses and Paramedics provides the most up-to-date and comprehensive coverage of clinical procedures and issues encountered in contemporary emergency care in Australia and New Zealand. Written by leading academics and clinicians, this fully revised and updated edition follows the patient's journey from pre-hospital retrieval to definitive care. With a strong focus on multidisciplinary care, this evidence-based emergency and trauma resource will appeal to pre-hospital care providers, rural, remote and urban emergency nurses and allied health professionals, as well as disaster management and interfacility transport staff. Essential concepts are covered in a logical order, commencing with An introduction to emergency professions and professional issues Clinical and health systems Patient presentations ordered by body system as well as toxicology, envenomation, ocular, environmental emergencies and unique population groups Major trauma assessment and management and end-of-life care information and considerations. Emergency and Trauma Care for Nurses and Paramedics 2e continues to be the pre-eminent resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary care from retrieval through to rehabilitation. A cultural safety approach is included throughout - addressing cultural diversity, beliefs and values and focusing on Aboriginal and Torres Strait Islander health and Māori health Essentials outline the main points addressed in each chapter Practice tips throughout assist with communication skills, procedures and assessment Case studies are supported by questions and answers to encourage active learning New online resources available on Evolve, including over 30 new case studies with paramedic-specific questions. Highlighted skills - cross references to the Clinical Skills chapter throughout text Over 30 new case studies Patient journey from pre-hospital and emergency-specific case studies Critical thinking questions at the end of chapters Chapter 35 Obstetric emergencies now includes 'Supporting a normal birth'.

This completely updated and revised new edition is specially written for qualified nurses working in intensive care nursing units. Fully comprehensive and developed to be as accessible as possible it contains four new chapters with valuable new and updated clinical scenarios to aid learning. Intensive Care Nursing is structured in user-friendly sections. Each chapter contains 'fundamental knowledge' needed to understand the chapter, an introduction, 'Implications for practice', a chapter summary, completely updated further reading, 'time out' sections for revision and a clinical scenario with questions included. This second edition has been fully developed and reviewed by practitioners and teachers, as well as a senior pharmacist and covers: patient-focused issues of bedside nursing the technical knowledge necessary to care safely for ICU patients the more common and specialized disease processes and treatments encountered how nurses can use their knowledge and skills to develop their own and others' practice. A support website at www.routledge.com/textbooks/0415373239 links to other important sites, gives answers to the clinical scenario questions and provides a forum for discussion of important clinical issues. Written by a practice development nurse with a strong clinical background in intensive care nursing and experience of teaching nursing, Intensive Care Nursing is essential reading for nurses and health professionals working with high dependency patients.

A comprehensive coronary care textbook for medical, nursing and paramedic staff The Coronary Care Manual, 2nd Edition is a practical medical manual designed to assist with management of the acute coronary patient. This respected medical resource is written by a group of coronary experts, both Australian and international. Its aim is to strike a balance between a large and rapidly-changing evidence base and practical application in the Coronary Care Unit, Intensive Care Unit, Emergency Department and the ambulance. The second edition of this important health textbook covers an extensive range of coronary care medicine, providing a handy companion for a night 'on call'. Chapter topics in the Coronary Care Manual, 2nd Edition include pathophysiology, drug and non-drug therapies and postcoronary management, with chapters organised into subsections. Completely redesigned with fresh, new artwork, this new edition of the Coronary Care Manual is organised to suit academics and medical practitioners alike. [] covers a broad range of coronary care medicine [] provides specific advice on the management of common clinical problems [] eliminates the need to refer to a larger reference book [] features a consistent style and focus, with standardised artwork for figures [] is now also available as an eBook! A code inside the Coronary Care Manual enables a full text download, allowing you to browse and search electronically, make notes and bookmarks in the electronic files and highlight material

This practical guide provides the reader with answers to important clinically relevant questions regarding the evaluation and management of acute kidney injury (AKI). All aspects of critical care nephrology are covered, from pathophysiology and diagnosis to prevention and treatment. The questions considered relate to a wide range of issues, such as: How do I diagnose AKI? How can I protect the kidney in clinical practice? How do I manage patients with AKI? When should I initiate and how do I perform renal replacement therapy (RRT)? Which type of RTT is most appropriate for my patient? Should I give specific nutrients? In addition to providing practical guidelines and treatment algorithms, the book includes calculators for continuous RRT and anticoagulant dosing. The authors are internationally renowned experts in the fields of Intensive Care Medicine and Nephrology and all contributions are written in a clear and concise style and have been peer reviewed. Acute Nephrology for the Critical Care Physician will serve as a very useful source for intensivists, anesthesiologists and nephrologists involved in the management and treatment of critically ill patients at risk of or affected by AKI.

Huzar's ECG and 12-Lead Interpretation, 5th Edition, by Keith Wesley, M.D., helps you correlate ECG interpretation with clinical findings to identify and address selected heart rhythms. The text is structured to match the order in which you learn specific skills: ECG components are presented first, followed by rhythm interpretation and clinical implications. Take-Home Points, key definitions, chapter review questions, and practice strips help you understand and retain complex information NEW! Discusses the difference between sinus arrest and SA block to help clarify concepts that learners often find confusing. UPDATED! STEMI and NSTEMI treatment guidelines updated to the latest standards. Coverage of both basic and advanced concepts incorporates the latest research developments and provides material pertinent to both beginning and experienced prehospital care providers. UPDATED AND EXPANDED! Key characteristics of each heart rhythm are summarized to allow you to learn or review each rhythm at a glance. Patient care algorithms outline step-by-step management and treatment, correlating ECG interpretation with history and exam findings. Advanced treatment content, such as complete coverage of thrombus formation, treatment, and management, offers critical information for both hospital and prehospital settings. UPDATED AND EXPANDED! Key definitions define important terms right on the page, near relevant content, making it unnecessary to flip to the back-of-book glossary while reading or studying. Key definitions, chapter review questions, and glossary updated to reflect new content. Chapter review questions (with answers in an appendix) test your understanding of key topics. Appendix with 200+ practice strips, questions, and answer keys reinforces major concepts and ties information together. UPDATED! Glossary defines key terms, supplementing the on-page Key Definitions. Expert authorship from Dr. Keith Wesley, who has been involved in EMS since 1989 and is a board-certified emergency medicine physician. Self-assessment answer key allows you to check their own work for self-evaluation. Chapter outlines offer a quick overview of each chapter's content.

Addresses the challenges of managing critically ill obstetric patients, with chapters authored by intensivists/anesthesiologists and obstetricians/maternal-fetal medicine specialists.
