UK Rivers Map | WWF

Rivers usually begin in upland areas, when rain falls on high ground and begins to flow downhill. They always flow downhill because of gravity. They then flow across the land - meandering - or...

Rivers - BBC Bitesize

Eventually, a river flows into another large body of water, such as an ocean, bay, or lake. The transition between river and ocean, bay or lake is known as a delta . Most rivers have a delta, an area where the river divides into many channels and river water mixes with sea or lake water as the river water reaches the end of its journey.

Basic Geography of Rivers - ThoughtCo

From source to mouth. Toggle text. Rivers run from the mountains to the sea. They are fast and narrow at their source (start) and get steadily wider and slower towards the mouth. Flowing through steep mountains, a river is powerful enough to wear away the land underneath, creating V-shaped valleys and steep-sided gorges.
