An award-winning, unforgettable black book about colour, which shows you how to "see" without your eyes. It can be hard for a sighted person to imagine what it is like to be blind. But in this breathtaking, ground-breaking and award-winning colour book, Menena Cottin and Rosana Faria try to convey the experience of a person who can see only through their sense of touch, taste, smell or hearing.

This is the Big Book of False Flags and Government Conspiracies, I tried to fit as much as I could find in one place for your reading enjoyment.

The "Big Black Book of Electronic Surveillance" opens the door to the world of intelligence arms merchants whose work shapes advanced government surveillance. These companies hail from Austria, Australia, Canada, China, the Czech Republic, Denmark, Dubai, France, Germany, India, Israel, Italy, Japan, Korea, The Netherlands, Singapore, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, Ukraine, the United Arab Emirates, the United Kingdom, the United States and many other nations. This volume presents the market leaders and the surveillance solutions and services they provide to governments: packet monitoring, analytics, offensive cyber, mobile location and forensics, lawful intercept, social media intelligence (SOCMINT), facial recognition, voice biometrics and other forms of open source intelligence (OSINT), plus relevant forms of artificial intelligence that automate performance. Also included: military-focused technologies that deliver or intercept intelligence at the tactical edge, such as forward-looking infrared (FLIR), RF monitoring, Electro-Optical/Infrared, eLoran, and systems with the power to take control of critical infrastructure. "The Big Black Book of Electronic Surveillance" is at once a textbook, a manual for government agencies charged with safeguarding national security, and an encyclopedia on this vital industry. Surveillance is a business. Among the largest players are IT and communications industry giants that quietly develop and profit from surveillance solutions. Laws that authorize and govern their work are quite similar from one country to the next. Democratic nations such as the USA, UK, France, Germany, Italy and The Netherlands are little more constrained in deploying surveillance solutions than are Russia, China, Iran, North Korea and other authoritarian regimes. For the most part, government agencies are not technology innovators, but rather, end-users of solutions developed and deployed by Intelligence Systems Support (ISS) vendors. The power that governments exercise via current modes of electronic surveillance will be dwarfed by what comes next: advances in artificial intelligence and quantum computing that take surveillance to the next level.

Most sections of The Big Black Book were written by Christopher S. Hyatt, Ph.D. along with his friends and colleagues between 2003 and 2008 and were originally published as individual booklets. Now the entire series has been collected into this single volume. But what is The Big Black Book about? The sections include: Part I: Principles of Extreme Living Part II: Extreme: The Twisted Man Part III: Galts Ark The Black Symphony Part IV: Breaking Free Part V: A Day at the Zoo Part VI: The Yoga of Hate Part VII: Omega, Cirque Apok á lypsis Little more can be said lest we give away its intent and reduce its impact.

The uprising at Attica Prison remains one of the bloodiest civil rights confrontations in American history... but without Frank "Big Black" Smith it could have been even worse. Now for the first time, the late Frank "Big Black" Smith shares his experience at the center of this uprising, struggling to protect hostages, prisoners and negotiators alike. Before his death, Frank "Big Black" Smith worked with writer and long time friend, Jared Reinmuth, to share the true story of his time in Attica State Prison. Adapted to a graphic novel by Am é ziane (Dark Horse ' s Muhammad Ali), this is an unflinching look at the price of standing up to injustice.
