~~30 Best Book-Chemical Pictures-The Wet Plate Collodion----~~

The collodion process is an early photographic process. The collodion process, mostly synonymous with the "collodion wet plate process", requires the photographic material to be coated, sensitized, exposed and developed within the span of about fifteen minutes, necessitating a portable darkroom for use in the field. Collodion is normally used in its wet form, but can also be used in humid or dry form, at the cost of greatly increased exposure time. The latter made the dry form unsuitable for the
