Essays by game designers and producers survey the top one hundred hobby games of the last fifty years, describing familiar and offbeat games of all types, including roleplaying, collectible card, miniature, war, and board.

This new edition of this bestselling guide offers an integrated approach to process improvement that delivers quick and substantial results in quality and productivity in diverse settings. The authors explore their Model for Improvement that worked with international improvement efforts at multinational companies as well as in different industries such as healthcare and public agencies. This edition includes new information that shows how to accelerate improvement by spreading changes across multiple sites. The book presents a practical tool kit of ideas, examples, and applications.

Tells how clutches & transmissions work - gear, friction, & hydrostatic. Gives basics of service & repair of major types of drives, transmission, transaxles, & clutches used in compact equipment. Includes troubleshooting guides. It provides the reader with a list of skills & knowledge that should be learned with each chapter. CONTENTS: Basic principles, clutches, mechanical transmissions, hydrostatic transmissions, belt & chain drives, differentials, final drives, power take-offs, service & maintenance & troubleshooting.

This book presents ideas on education, gender and intersectionality through a transdisciplinary frame by crossing disciplinary and methodological borders. Exploring the diversity of educational settings ranging from early childhood to adult education, it brings together scholars from various disciplines to discuss, deconstruct and problematize gender and education in relation to several themes in a comparative, intersectional, local, national, regional and international perspective. Each chapter approaches the topic in an intersectional and/or transnational manner and creates powerful gendered educational knowledge. Questions addressed in the book include: What are the challenges or barriers to gender-equal education? How can we understand the gaps between formal policies and educational practices? The chapters in the book illustrate how gender and education are relevant and needed concepts within the field of transdisciplinary research. The authors hail from a range of countries, such as Croatia, Indonesia, Turkey, UK, as well as the Nordic region, and they critically examine gender and education at all levels and in diverse sectors, and with varied lenses, such as neoliberalism in education, and the inclusion of newcomers and refugees. The work also critically investigates programs and pedagogical approaches, culture and values, knowledge and identity in teacher education. The book further addresses criticisms of Western and Anglophone bias around “white feminism” and the norm of white, male and heterosexual privilege.
