Presents an account of the scientific achievements and lives of cosmologists from Babylonians to Newton.

Since its birth in 1781, Los Angeles has come to define both the material and spiritual force of American civilization. The American dream is realized, experienced, and lost in the City of Angels. Unmasking L.A.: Third Worlds and the City, an interdisciplinary collection of essays, dialogues, and photographs, seeks to reveal the third world geographies, cultures, and populations of Los Angeles. It examines the social, political, cultural, and literary climate of the city, bringing together diverse responses to the complexities facing Los Angeles from respected intellectuals, writers, and artists such as Mike Davis, Deepak Chopra, and Gayatri Chakravorty Spivak. By uncovering the forces that marginalize Los Angeles's ever-shifting populations into internal third worlds, the collection unmasks the raw contradictions, the grim paradoxes, and the understated ironies of the global city.

War is inevitable and the person with the biggest stick more often than not wins.Before all that though, Pythias is sitting at his desk at the famous hero agency of Iatros dreaming of a chance to prove himself . . . and obviously the fame and fortune that automatically comes after proving yourself.A simple quest to deliver a letter throws him into the opportunity he always thought he wanted. Joining forces with a princess and a giant, his journey takes him to every corner of this fantasy world, from desert lands, vast forests and even a temple above the clouds. His destiny now pulls him towards an ancient weapon and a race against time to stop an attack by the dark warriors, an evil army that has travelled from afar with one objective . . . to destroy everything. Pythias really shows you how there is another world out there, if you are only brave enough to leave your desk.
