Statements

Code Conventions for the Java Programming Language: 7 ...

One of the goals is to make the Eclipse Platform blend in with the Java platform. This goal is furthered by our following suit. Oracle's Code Conventions for the Java Programming Language covers filenames, file organization, indentation, comments, declarations, statements, white space, naming conventions, and programming practices. All code written for the Eclipse Platform should follow these conventions except as noted below.

Coding Conventions - Eclipsepedia

Very short comments can appear on the same line as the code they

File Type PDF Java Code Conventions Oracle

describe, but should be shifted far enough to separate them from the statements. If more than one short comment appears in a chunk of code, they should all be indented to the same tab setting. Here's an example of a trailing comment in Java code:

and opportunities of Java-based Internet computing. Oracle Database offers two different Java APIs for accessing SQL data, JDBC and SQLJ. Both these APIs are available on the client, and the JDBC API is also available on the server. As a result, you can deploy your applications on the client and server. The following topics introduce the Java APIs provided by Oracle Database: JDBC Drivers. SQLJ

1 Using Java with Oracle Database. Oracle Database is a relational database that you can use to store, use, and modify data. The Java Database Connectivity (JDBC) standard is used by Java applications to access and manipulate data in relational databases. JDBC is an industry-standard application programming interface (API) that lets you access a RDBMS using SQL from Java.
