Globalization has created an interconnected world, but has not diminished violence and militarism. The Economics of Killing describes how the power of global elites, entrenched under globalization, has created a deadly cycle of violence. In this groundbreaking work, Vijay Mehta shows how attempts at peaceful national development are routinely blocked by Western powers. He centers the 2008 financial crisis in US attempts to block China's model of development. He shows how Europe and the US conspire with regional dictators to prevent countries from developing advanced industries, and how this system has fed terrorism. Mehata argues that a different world is possible, based on policies of disarmament, demilitarization, and sustainable development. This original and thought-provoking book will be of great interest to anyone concerned about the consequences of endless war fueled by the West.

BUPERS 1610.1B

“I found solace in nothing. Because everything was temporary. And days flew by like heavy cigarette smoke floating above the dancing heads in the city’s most notorious club, like speech bubbles written in a language you cannot understand, like a dragon’s breath you keep chasing, like pills that move from your hand to your red lips.” Gratiagusti Chananya Rompas’ personal essays are troves of memories she can always turn back to. They started off as day-to-day accounts of events from her younger years and the now. But Anya, as she is often called, is obsessed with how things people do – often in haste – quickly fossilize into memories, and how these memories, in turn, shape their lives.

Sovereignty unfolds over two parallel timelines. In present-day Oklahoma, a young Cherokee lawyer, Sarah Ridge Polson, and her colleague Jim Ross defend the inherent jurisdiction of Cherokee Nation in the U.S. Supreme Court when a non-Indian defendant challenges the Nation’s authority to prosecute non-Indian perpetrators of domestic violence. Their collaboration is juxtaposed with scenes from 1835, when Cherokee Nation was eight hundred miles to the east in the southern Appalachians. That year, Sarah’s and Jim’s ancestors, historic Cherokee rivals, were bitterly divided over a proposed treaty with the administration of Andrew Jackson, the Treaty of New Echota, which led to the nation’s removal to Oklahoma on the infamous Trail of Tears. A direct descendant of nineteenth-century Cherokee leaders

John Ridge and Major Ridge, Mary Kathryn Nagle has penned a play that twists and turns from violent outbursts to healing monologues, illuminating a provocative double meaning for the sovereignty of both tribal territory and women's bodies. Taking as its point of departure the story of one lawyer's passionate defense of the rights of her people to prosecute non-natives who commit crimes on reservations, *Sovereignty* opens up into an expansive exploration of the circular continuity of history, human memory, and the power of human relationships.

South African Essays on 'Universal' Shakespeare collects new scholarship and extant (but previously unpublished) material, reflecting the changing nature of Shakespeare studies across various 'generation gaps'. Each essay, in exploring the nuances of Shakespearean production and reception across time and space, is inflected by a South African connection. In some cases, this is simply because of the author's nationality or institutional affiliation; in others, there is a direct engagement with what Shakespeare means, or has meant, in South Africa. By investigating the universality of Shakespeare from both implicitly and explicitly 'southern' perspectives, the book presents new possibilities for considering (and reassessing) shifting manifestations of Shakespeare's work in major Shakespearean 'centres' such as Britain and the United States, as well as across the global North and South.
