'MplusAutomation' -
R

MplusAutomation
takes care of figuring
out which variables
from your R dataset
are used in the model
and which are not (if it
get's confused, you
can also specify
usevariables). It
creates a dataset
suitable for Mplus,

Read Free Mplus Automation

calls Mplus to run the model on the dataset, and reads it back into R. There is even pretty printing now. To see the results:
