Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Nascita, cibo, sesso, morte: sono quattro esperienze fondamentali della vita umana, che la definiscono e la sintetizzano e che ognuno di noi deve affrontare. Ma la tecnologia sta spingendo sempre più in là le frontiere, i limiti stessi di queste esperienze, cambiandone il significato. Cosa succederebbe se potessimo avere figli senza gravidanze? Se potessimo avere rapporti sessuali soddisfacenti senza bisogno di altri esseri umani? Se potessimo mangiare cibo creato in laboratorio? Se potessimo morire quando vogliamo, in modo del tutto indolore? Jenny Kleeman ha scritto un reportage sul futuro (prossimo) di eros, cibo, morte e nascita: ha intervistato robot del sesso coscienti e senzienti, indistinguibili dagli esseri umani, ha assaggiato la carne allevata in provetta e ha partecipato a incontri riservatissimi dove si danno alle persone gli strumenti tecnici per morire quando desiderano, nel modo meno doloroso possibile. Ha visto cose, insomma, che noi umani non potremmo neppure immaginarci e ha intervistato i loro creatori, per capire quale sia il limite oltre il quale non potremo più definirci umani. Ammesso che ce ne sia uno.

Based on their extensive experience with teaching R and statistics to applied scientists, the authors provide a beginner's guide to R. To avoid the difficulty of teaching R and statistics at the same time, statistical methods are kept to a minimum. Oggi, con i suoi oltre 150 milioni di utenti, l'egemonia di Netflix nel settore dell'intrattenimento video sembra un fatto inevitabile, ma ai suoi inizi la startup più innovativa del ventesimo secolo contava ben poche persone che credevano nelle sue possibilità di successo e ha affrontato disastri a ogni passo. In questo divertente memoir, Marc Randolph ripercorre le prime fasi della storia di Netflix, dall'invio del primo CD di prova (nella busta di un biglietto di auguri e senza nemmeno una custodia) alla corsa alla quotazione in borsa proprio dopo lo scoppio della bolla delle dot-com, condividendo i dietro le quinte e i colpi di scena che caratterizzano la vita di tutte le startup. Pagina dopo pagina, emergono chiari i punti cardine della filosofia imprenditoriale di Randolph e che costituiscono il DNA che ancora oggi caratterizza Netflix: dal mantra "nessuno sa niente" al "Principio del Canada" al modo per costruire una cultura aziendale informale e rilassata che responsabilizza i collaboratori invece di controllarli. Il racconto di Randolph restituisce il clima pionieristico degli anni d'oro della Silicon Valley.

Warren Buffett is the most famous investor of all time and one of today's most admired business leaders. He became a billionaire and investment sage by looking at companies as businesses rather than prices on a stock screen. The first two editions of *The Warren Buffett Way* gave investors their first in-depth look at the innovative investment and business strategies behind Buffett's spectacular success. The new edition updates readers on the latest investments by Buffett. And, more importantly, it draws on the new field of behavioral finance to explain how investors can overcome the common obstacles that prevent them from investing like Buffett. New material includes: How to think like a long-term investor — just like Buffett Why loss aversion, the tendency of most investors to overweight the pain of losing money, is one

of the biggest obstacles that investors must overcome. Why behaving rationally in the face of the ups and downs of the market has been the key to Buffett's investing success Analysis of Buffett's recent acquisition of H.J. Heinz and his investment in IBM stock The greatest challenge to emulating Buffett is not in the selection of the right stocks, Hagstrom writes, but in having the fortitude to stick with sound investments in the face of economic and market uncertainty. The new edition explains the psychological foundations of Buffett's approach, thus giving readers the best roadmap yet for mastering both the principles and behaviors that have made Buffett the greatest investor of our generation.

Compassionate and profound in their wry humor, this collection of stories captures the poetry of human relationships at the point where reality and imagination meet.

Beloved friend, The year is 2084, and that famous Margaret Thatcher quote has become a reality: There really is no such thing as society. No one speaks to anyone else. No one looks at anyone else. People don't collaborate, they only compete. I hate to admit it, but this has had tragic consequences. Unable to satisfy their social urges, the population has fallen into a pit of depression and anxiety. Suicide has become the norm. It all sounds rather morbid, does it not? But please don't despair, there is hope, and it comes in the form of our hero: Renee Ann Blanca. Wishing to fill the society-shaped hole in her life, our Renee does the unthinkable: She goes in search of human company! It's a radical act and an enormous challenge. But that, I suppose, is why her tale's worth recounting. It's as gripping as it is touching, and I think you're going to love it...
