The drivetrain is the part of a motorized vehicle which connects the engine and

Online Library

Transmission And Driveline

transmission to the wheel axles. The driveline includes everything in the chain from the engine to the drive wheels, but the drivetrain consists of everything after the transmission — all driveshafts, axles, joints, differentials and wheels.

The contents of a driveline system are

Online Library

Transmission And Driveline

clutch, transmission, shaft, axle and wheel. It is an important part of a vehicle. It can be said as the controllable parts of the vehicle.

The gear or the transmission is the system which boosts torque and power. The clutch is the system which controls the transmission if it runs out of control.
